

MULTIPASSWORDS PRIVACY POLICY

Guillermo J. Caamaño, as director of IDT S.L., declares that **MULTIPASSWORDS FOR IOS** stores all user information locally inside the device and **does not collect any kind of information about the user or the device on which it is installed.**

If the user redeems a test code using the "Redeem code" button on the help screen, the application records the date and time the code was activated, exclusively for statistical purposes and internal use at IDT. The test codes are created by IDT for promotional purposes and provided to specific people. Any other code is rejected.
